INTRODUCTION

The 1995 Traffic By Sections publication depicts the National Highway System (NHS), State Primary, State Secondary and State Urban Routes after the implementation of the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA).

This report presents statistical information on traffic volumes Annual Average Daily Traffic (AADT) and Vehicle Miles of Travel (VMT) on Montana's National Highway System and State Routes for the years 1993, 1994 and 1995. The statistics are presented in four sections: Interstate, "P" Routes with portions of the NHS, State Secondary and "U" Routes with portions of the NHS. These are given as weighted[1] AADT between section control points.[2] On the Interstate and "P" Routes, AADT and vehicle miles of travel for commercial vehicles are also provided.

The Highway Information System (HIS) has been updated to reflect the NHS and the State Routes designated by the Transportation Commission in November of 1993 and signed into law by the President on November 28, 1995. The 1995 Traffic By Sections publication reflects those changes.

For specific traffic count and location information, contact the Traffic Data Collection Section at (406)444-6122.

[1]Computer process that averages the data between section control points.

[2]Section control points consist of any point that reflects a traffic change on a roadway such as junctions, intersections with other roadways and intersections with county, municipality or urban boundaries.
